Storia e Tradizione

History and Tradition

L' arte della fusione del Bronzo esiste nella nostra valle da circa quattromila anni. Recenti indagini archeologiche condotte in un piccolo abitato in media Valle Sabbia sulla Corna Nibbia mostrano tracce di stampi in terracotta, scorie di fusione di bronzo e manufatti che testimoniano l'antica tradizione metallurgica risalente al 1.800 AC. E' possibile ammirare questi preziosi reperti al Museo Archeologico della Valle Sabbia in Gavardo intitolato "L'uomo e il metallo nei secoli".

Oggi Giara Art Design è orgogliosa di poter continuare la produzione di preziosi oggetti nei luoghi in cui i nostri progenitori iniziarono questa nobile tradizione e continuare anche in futuro.

The art of Bronze casting exists in our valley by about four thousand years. Recent archaeological investigations conducted in a small village in the middle of the Sabbia Valley, on the Corna Nibbia mountain, show traces of molds in terracotta, bronze fusion slags and hand crafted bronze artifacts as evidence of metallurgical activity dating back to 1,800 BC. You can admire these precious artifacts at the Archaeological Museum of the Sabbia Valley in Gavardo named "The Man and Metal through the centuries".

Today Giara Art Design is proud to continue the tradition of manufacturing exquisite bronze products in close proximity to where our forefathers began this noble tradition and look forward to continue for many more years.

Giara
Art design

la nostra terra... le nostre tradizioni... il nostro lavoro

La collezione Giara è frutto di una profonda ricerca negli stili che hanno caratterizzato le varie epoche dell'arte e dell'architettura. I nostri prodotti sono realizzati in lega BRITANNIUM e BRONZO, prestigiosi metalli di origini medioevali, e vengono fusi e lavorati manualmente nel rispetto delle antiche tradizioni artigianali della nostra valle.

La caratteristica del nostro prodotto, frutto di pluriennale esperienza nel settore, è di essere proposto in finitura naturale non verniciato secondo norme ambientali ed ecologiche attuali.

The Giara Collection is the result of an in depth research of various styles, spanning many years of architectural design. Giara products are manufactured from BRITANNIUM and BRONZE, prized metals with origins that date back to the middle ages.

A hand crafted product reminiscent of the ancient artisan traditions of our valley, this beautifully designed, unlacquered product conforms to current environmental and ecological standards.

A product from the past, designed for the future!

Giara
Art design

our land... our tradition... our vocation

Stile medioevale, questa architettura è l'espressione dei grandi spazi protesi verso l'alto che annullano la fisicità delle masse portanti.

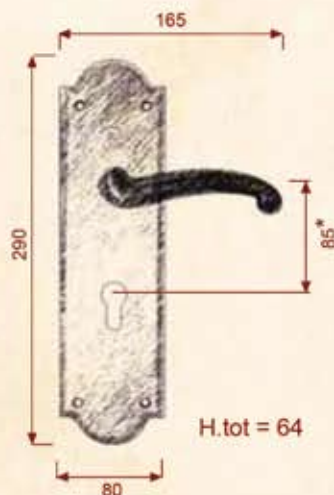

Gothic design dates back to the Middle Ages. This architecture is the expression of great spaces with attention to the very smallest of details.

Britannium

E' espressione della cultura d'avanguardia libera e spregiudicata del periodo. Questo stile predilige i materiali naturali e accentua il ruolo dell'artigianato con produzioni limitate.

In England the main proponent of this art form was William Morris whose work aroused the complete renewal of the forms of this decorative design. This style with a preference for the natural materials accentuates the handcrafted designs.

Back-to-back bolt

Confezione Packaging

*I prodotti della collezione Giara,
dopo un attento controllo manuale,
vengono confezionati singolarmente
in sacchetti di juta*

*Giara products, after a deep inspection,
are packed individually into jute
bags*

Pulizia Cleaning

*Per la pulizia dei nostri prodotti si
raccomanda di usare un panno
soffice eventualmente inumidito.
Per i prodotti in Britannio è
possibile utilizzare prodotti per
l'argenteria.*

*For the cleaning of our products we
recommend to use a soft cloth.
For the Britannium products it's
possible to use a silver polishing
compound.*
